

Moodtune Release Notes: April 10

- Spotify login functionality
 - Users are prompted to login with spotify, allowing them to access recommendation and statistics features.
- Recommendation functionality implemented
 - Able to enter simple genre words to query spotify for 10 track recommendations
- Statistics functionality implemented
 - Able to see your spotify statistics for previous periods of time, able to be selected by the user.
- Login functionality implemented
 - Users are able to login with accounts created through registration.
- Registration functionality implemented
 - Users are able to register new accounts (passwords stored safely with hashed values)
- Token refresh
 - Currently expired tokens can be refreshed manually through the “token refresh” button on the main page (will be automated at a later date)
